PROJECTS

E-Commerce App using MERN Stack
(10/2023 - 10/2023)

- This is a full stack e-commerce web application that provides a user-friendly and efficient platform for e-commerce businesses . It encompasses all the essential features and functionalities required for a successful online shopping experience like **User Registration and Authentication, Product Catalog, Product Details, Shopping Cart and Search & Filters.**

To-Do Application using MERN Stack
(10/2023 - 10/2023)

- In this application users can create accounts, sign in securely, and manage their tasks under their profiles.

Employee Data Management System
(04/2023 - 04/2023)

- The "Employee Data Management System" is a web-based application built with **HTML, CSS, JavaScript and React.js** . It features a user-friendly form to capture employee information, including name, DOB, gender, email, and address. The data is seamlessly presented in a dynamically updated table, providing an organized and accessible overview of registered employees.
